## Too Amiable

By DOROTHEA HALE

Copyright, 1910, by American Press Association.

"Laura, dear, I am so glad you have come. If any one else had called this morning I should have been 'not at home.'"

"What a convenient expression, 'not at home'! It's like kings and presidents, who can speak officially or as private individuals, and it isn't a lie. But what's troubling you?"

"George! Has he been giving way to that violent temper again?"

"Quite the reverse. He has suddenly turned amiable."

"There's nothing bad about that."

"No, nothing bad, except that I'm not used to it. I don't care how a man treats me so long as I understand how to meet him. George has always been impulsive, irritable, quick spoken. He's keeping something from me. On Wednesdays he goes out at 8 o'clock in the evening and comes back between 9 and half past. I've tried my best to get out of him where he goes, but he won't tell me. He just palavers over me, calls me his 'little darling,' jokes about woman's curiosity, but I get nothing out of him."

"You suspect?"

"No special woman."

"But yet you know she exists."

"Of course."

"Have you looked on the shoulder of his coat for powder? Lots of men have been caught that way. The woman puts her head down there, and they all use powder. You're sure to find it on his coat."

"I haven't noticed any. Besides, I can't understand this self control. A man who is in love with another woman isn't usually very saltlike in his treatment of his wife."

"There you're wrong, George. Feeling that he is untrue to you, keeps his self control to prevent his giving himself away. A man who is doing that must be very guarded. The feelings control the tongue, and the tongue is liable to betray him at any moment."

"I know George better than that. I twisted him about going out at 8 o'clock to visit a sweetheart, and he laughed at me. He may have the sweetheart, but that is not the hour at which he spends time with her. He isn't gone long enough."

"Why don't you shadow him when he goes out in the evening?"

"The only reason I haven't done it is that I don't like to do such a thing. George has always trusted me implicitly, and I don't like to commit an overt act in my distrust of him."

"You silly thing! You don't know these men. They wouldn't hesitate, any one of them, to put a professional detective on his wife. And yet you hesitate to walk at a safe distance behind George just to see that he isn't getting into mischief. Why, it's your duty to watch him. Men are like children when women get hold of them and need a nurse. Would you trust little George to take care of himself? Come, get some stiffening into you! I'll help you. I'll come around this evening at 8 o'clock and lie in wait for George when he goes out, keeping him in sight till you come out after him. Then we two will follow him and solve this mystery."

"Well, I don't like to do it and couldn't do it by myself, but since you are going with me I suppose I can. Come at five minutes before 8. Go down under the stoop and wait till you hear George going out. Follow him, and I will catch up with you. I have often seen him start, and he always goes west. So I can't fail to go the right way."

That evening the two women put

this plan into execution. George went out unsuspectingly, his wife's friend was under the stoop, and his wife came out within a minute after he had left the house. He walked leisurely up the street, turned several corners and finally mounted the steps of a house that was perfectly familiar to his wife.

"Oh, heavens," she exclaimed, "he's going into Dr. Fuller's! He has some terrible disease. I'm going in to find out what it is!"

"Better wait till you have him at home, when you can talk with him calmly."

"I can't wait. I'm frightened to death. Oh, what can be the matter?"

The husband had entered the house and was in the doctor's private room for receiving patients when there was a pull at the bell. Another patient, it was supposed, entered and without waiting for her turn pushed her way into the room and fell upon her husband's neck, moaning:

"Oh, George! What is this terrible disease from which you are suffering? Why have you hidden it from me?"

George smiled a sickly smile at the doctor, who interposed:

"Your husband, my dear madam, has been showing symptoms of a breaking down of the nerve centers. I told him that his averting a collapse depended upon his maintaining as perfect an equilibrium as possible. Any giving way to anger or other disagreeable emotion might have been fatal to him. But now I am happy to say, thanks to his conquest of himself and doubtless your aid, he is so far improved that I consider him out of danger."

"Thank heaven! But why didn't you tell me, George?"

"Oh, I didn't wish to worry you. You women are such confiding, sensitive creatures. I knew that if you were aware of my danger you would wear me out with troubling about it."

LEEWAY FOR ONSIDE KICK.

Mr. McCurdy Thinks That Play Should Be Given More Latitude.

Springfield, Mass., Dec. 5.—Dr. J. H. McCurdy, football coach at Springfield training school, said yesterday morning that the football season had proved the advisability of the changes made last spring in the playing rules, and that personally he should favor further changes along the same line. He considers the game as played under the rules of the season just past as more open and consequently as more interesting from a spectacular standpoint, and he considers that if further codification should eliminate interference and the danger entailed in the breaking up of this style of defense, the game would be adapted for men of moderate physical prowess and less dangerous for all.

One change that he favors would be a removal of the lately placed rulings on the inside kick. As the game for several years has been changing ways in favor of the offense, Mr. McCurdy would like to have the inside kick allowed to drop anywhere beyond the line of scrimmage. This would also open the game further, he thinks, and give more leeway to the offense.

Speaking in regard to some of the objections which have been made to the 20-yard-zone restrictions, and principally to the suggestion that has been made that restriction be removed in case of punt, he pointed out the fact that this would still further cloud up the situation, as the defense would not know until it would be too late to act whether a punt or a pass was to be made.

PENNSYLVANIA 7,665,111.

Population Jumps 21.6 Per Cent.—West Virginia Gains.

Washington, Dec. 5.—The population of the state of Pennsylvania is 7,665,111, according to statistics of the 13th census made public yesterday. This is an increase of 1,362,900, or 21.6 per cent. over 6,302,211 in 1900. The increase from 1890 to 1900 was 1,044,101, or 19.9 per cent.

The population of the state of West Virginia is 1,231,119. This is an increase of 262,219, or 27.4 per cent. over 968,900 in 1900. The increase from 1890 to 1900 was 166,000, or 25.7 per cent.

Washington, Dec. 5.—A general reduction of the rates for upper berth on Pullman cars, and in certain instances, for lower berths, was announced yesterday before Commissioners Franklin K. Lane and E. E. Clark of the interstate commerce commission by G. S. Fernald of the Pullman company. No testimony was taken in the cases before the commission.

The reduction in upper berth rates offered is 20 per cent. where the lowest berth rates exceed \$1.20. Various reductions are announced for the rates on lower berths in special instances.

Yesterday's hearing at which the promise of reduction was made was a releasing of the petition of George S. Loftis against the Pullman company, the point at issue being the upper berth rates between Chicago and the Pacific coast.

TWO ITALIAN FLIERS DEAD.

Aeroplane Capsized at Great Height. Engineer and Soldier Victims.

Rome, Dec. 5.—Army Engineer Cammarata, with a soldier as a passenger, attempted to make an aerobatic flight at the aviation field at Centocelle Saturday evening. The machine overturned when at a great height. Cammarata was hurled from his seat and was instantly killed.

The soldier fell with the aeroplane to the ground and was pinned beneath the motor. He received injuries from which he died in a few minutes.

## In Woman's Realm.

Lamp chimneys can be quickly cleaned by holding the hand over one end and putting the other end over the spout of a simmering teakettle. Rub at once with a smooth cloth or tissue paper.

How to succeed: Believe in yourself, believe in humanity, believe in the success of your undertaking. Fear nothing and no one. Love your work. Work, hope, trust. Keep in touch with to-day. Teach yourself to be practical and up-to-date and sensible. You cannot fail.

A good cover for a food chopper is made by taking a round piece of cloth, hemming it and running an elastic band through hem, if kept over top of chopper, will shield it from dust.

Some Delicious Sandwiches.

Marmalade Sandwich—Mix orange marmalade, finely chopped or ground meat and cream cheese thoroughly together, spread between thin, buttered slices of fine white bread and cut in long, narrow sandwiches.

Fig Sandwiches—Chop one-fourth pound of figs fine, add to them one-fourth cupful of water, and cook to a smooth paste. Then add one-third cupful of blanched almonds, chopped fine and pounded to a paste, with a little rose water and the juice of a lemon. When cold, spread upon either bread or cake. Dates or raisins may be used in place of the figs, if liked.

Maple and Nut Sandwiches—Grate the maple sugar or grind it through the food chopper, and mix with one-fourth cupful of finely chopped and delicately browned nut meats, spread between thin slices of well-buttered bread, using one slice of brown or graham and one of white bread for each sandwich.

Chocolate Sandwiches—Spread thin slices of bread with thick, sweet cream, then sprinkle generously with grated sweet chocolate and press together.

Gingerbread Sandwiches—Cut gingerbread into any desired form, spread with cream cheese and thin slices of preserved ginger.

Do It Early.

Do your Christmas shopping early, do it early, mother dear.

For you know you were exhausted with the flurry yesterday.

Please go out and get the trinkets for the prattling little ones—

Get the engines and the candy and the pistols and the guns;

Better start right out to-morrow with your money and your list.

But at 10 o'clock on Christmas eve you'll think of one you've missed.

Do your Christmas shopping early, do it early, sister dear;

Get a card for our rich uncle, that will put him on his ear.

Get a tie that is hand-painted for your one and only beau—

He will say it is too splendid for a man to wear; you know;

Work a pillow for the preacher, and get something for each friend;

But you'll find you've overlooked one when your shopping's at an end.

Do your Christmas shopping early, do it early, do you hear?

Let the higher cost of living give you neither fret nor fear.

There are friends in other countries who are very sure to write

Ere the first day of December leaves serenely into sight.

So be ready to remember all the people far away—

But you'll find you've failed to get one for someone on Christmas day.

Table sets in black glass with silver trimmings are among the latest novelties.

The kimono sleeve is being seen in dresses and separate waists; also in many coats.

Narrow, straight skirts are very popular, the body-and-sleeve-in-one idea being a favorite.

Dimple-breasted coats are always popular with girls. Shepherd checks, plaids, tweeds, homespun, velvet or corduroy make up very effectively.

Dorothy Dexter.

NO MUNICIPAL PLANT.

Is Likely to Be Voted by Village of Brattleboro.

Brattleboro, Dec. 5.—Voters of the village of Brattleboro will have an opportunity to decide Friday on a lighting policy for a period of years.

Present indications are that the village will not vote to establish a municipal plant, but to continue to use private companies for lighting.

Perhaps this attitude partly results from the fact that several of the towns and cities which have had a municipal plant operating in competition with a private plant already established.

Some time ago a report was submitted to the village by the committee appointed to investigate local conditions, in which it was generally understood that building of a municipal plant was recommended unless certain rates could be obtained.

Since that time, the Twin State Gas and Electric company has made substantial reductions, giving rates for commercial lighting less than those which prevail in most places.

The special meeting is called in accordance with the resolution passed at the village meeting held last spring in order to hear the report of the committee, the balliffs and terms which have been offered by the local company for another five-year contract.

Although it is not definitely known by the public what action the committee and balliffs will recommend at the meeting on this subject, it is generally thought that they will not think it advisable for the village of Brattleboro to engage in the enterprise, partially on the grounds of the debt which would be incurred, partially because of the inconveniences of having two competing concerns in a quassible business when any grievances against the system which has a monopoly can be adjusted by the public service commission, partially because of the improbability of a municipality conducting a business enterprise upon as economical terms as a private concern, and to a large extent because of the apparently reasonable rates which can be secured from the local company.

TO OFFER SPECIAL PRIZES.

To Educate Children in Back Districts About Agriculture.

Washington, D. C., Dec. 5.—The education of children in rural districts in accordance with the "back to the farm" movement, is to be encouraged by the department of agriculture, hereafter, Secretary Wilson purposes to undertake a campaign through the farmer's institutes. Prizes, such as a well-bred calf, a trio of chickens, a medal, or a trip to the county fair, are to be offered to winners of such contests as milking a cow, grooming a horse, shearing hay, cooking, baking, sheep shearing, corn husking—anything that appertains to life on the farm.

The department in a special bulletin setting forth plans says that out of every 100 young people in the country districts in the United States only one enters an agricultural college.

Of every 100 rural and urban children, only six ever reach the high school, and only six ever go beyond the elementary schools. Ninety-four out of every 100 children therefore finish their education with the district school, inasmuch as these 94 children include those in cities and towns, as well as those in the country districts, and since city and town children continue longer in school than do those of the country, it is safe to say that fully 97 out of every 100 rural boys and girls finish their education with the district school. The department suggests methods of directing courses of study and arranging and judging contests.

UPPER BERTH NOW CHEAPER.

Pullman Company Announces Reduction to Commerce Board.

Chicago, Dec. 5.—A general reduction of the rates for upper berth on Pullman cars, and in certain instances, for lower berths, was announced yesterday before Commissioners Franklin K. Lane and E. E. Clark of the interstate commerce commission by G. S. Fernald of the Pullman company. No testimony was taken in the cases before the commission.

The reduction in upper berth rates offered is 20 per cent. where the lowest berth rates exceed \$1.20. Various reductions are announced for the rates on lower berths in special instances.

Yesterday's hearing at which the promise of reduction was made was a releasing of the petition of George S. Loftis against the Pullman company, the point at issue being the upper berth rates between Chicago and the Pacific coast.

The soldier fell with the aeroplane to the ground and was pinned beneath the motor. He received injuries from which he died in a few minutes.

## BUNCOED THE BACK BAY FOLKS

Boy Broker Missing After Stealing Thousands

HE FADES FROM SIGHT

Had an Office in State Street—Said to Have Trimmed Harry Lauder—Got Bonds and Then Borrowed on Them.

Boston, Dec. 5.—Robert E. Davie, a young stock broker with offices on State street in Boston, where he has been popularly known as a "boy wizard," and has maintained a high standing with various financial institutions, is missing, according to the police, who have sent out circulars calling for his arrest on the charge of the theft of securities valued at \$100,000 from Anna L. Greenwald of 390 Broadway, Somerville.

Davie has moved in high social circles of Boston and Brookline and although only 23 years old he held prominent positions with two leading brokerage houses before he opened a stock broker's office for himself four years ago.

For four months Davie has been absent from the city, but it was only Saturday that the police announced that they held a warrant for his arrest.

Another victim was Harry Lauder, the Scotch comedian. Davie entertained Lauder at his home in Brookline at two banquets. At one of these banquets many prominent people were present to do honor to the comedian.

The alleged separation of Lauder from his funds took place at the second dinner. The comedian is a cautious investor and it had been his boast for years that the man who could trim him did not exist.

Some time ago Davie began the erection of a magnificent mansion in the millionaire colony of Weston, but work on the building was stopped after his disappearance. Recently he is said to have been seen in Mexico. Davie's mother, who lives in Allison, said Saturday that she does not know where he is.

His wife, who was Miss Annie Cotter, daughter of James E. Cotter, a wealthy attorney, has made her home with her parents for a year or more.

PACIFIC SALMON THRIVE IN EAST

Lake Champlain the Latest Field for Fish Commission's Breeding Experiments—Became Good Sized Fish.

Washington, Dec. 5.—After nearly 40 years of endeavor to establish the Chinook salmon of the Pacific coast in waters of the United States, where it is not indigenous, conclusive evidence of success in one instance has come to hand, according to George M. Bowers, United States fish commissioner, in his annual report to the secretary of commerce and labor.

"Within the past year it has been ascertained," says Mr. Bowers, "that the species has become established in Lake Superior, N. H., where numerous specimens, from three to five pounds in weight, have been taken by anglers. This is undoubtedly the result of a plant made in 1904 by the New Hampshire fish commission, the eggs having been supplied from the bureau's hatchery at Baird, Cal. Encouraged by the outcome of this experiment, the bureau made a plant of 10,000 infertile chinooks in Lake Champlain in the spring of 1910."

During the year the bureau distributed 2,235,392 fish and fish eggs, making a record which exceeded its record year of 1909 by 4 per cent. Of this total, 443,177,000 eggs and 7,425 fish were delivered to various state fish commissions, and 600,000 eggs of salmon and trout were shipped to Argentina, Japan and France.

GIRLHOOD AND Scott's Emulsion

are linked together. The reason is that at a period when a girl's digestion is weak

Scott's Emulsion provides her with powerful nourishment in easily digested form.

It's the food that builds and keeps up a girl's strength.

## MRS. EDDY IS DEAD

Founder of Christian Science Dies of Pneumonia

THE END CAME SATURDAY

Had Been Indisposed for Nine Days, But Took Her Daily Drive Two Days Before Death—A Notable Woman.

Boston, Dec. 5.—Mary Baker Eddy, founder of Christian Science, is dead. Announcement of the passing of the aged woman which occurred Saturday night at her home in Chestnut Hill, a suburb, was made at the mother church in this city yesterday.

"Natural causes" explains the death, according to Dr. George L. West, a district medical examiner, who was summoned a few hours after Mrs. Eddy passed away. Later Dr. West added to his statement by saying the more immediate cause was probably pneumonia.

The news of Mrs. Eddy's death was made known simultaneously by Judge Clifford P. Smith, first reader of the mother church, at the close of the morning service, and by Alfred Farlow of the Christian Science publication committee in a statement to the press. According to Mr. Farlow, Mrs. Eddy passed away at 10:45 o'clock Saturday night.

"She had been indisposed about nine days," said Mr. Farlow's statement, "but had been up and dressed, and as late as Thursday, transacted some business with one of the officials of the Christian Science church. She took her daily afternoon drive until two days before her going. Saturday night she fell quietly asleep and those around her could at first hardly realize that she had gone. Her thought was clear until the last and she left no final message."

"No physician was in attendance, but she had the assistance of the students who comprised her household. With her at the time of her departure were Mr. Calvin A. Frye, Mrs. Laura E. Sargent, Mrs. Ella S. Rathvon, Rev. Irving C. Tomlinson, her corresponding secretary; William R. Rathvon, and her secretary, Adam H. Dickey."

"No arrangements regarding the time or the place of her burial have yet been decided upon."

"It is well known to her household that she believed in simplicity on such occasions and in compliance with this knowledge it is expected the service will be private and of a simple nature, consisting probably of prayer and readings from the Bible, with some brief selections from the Christian Science textbook."

Only her relatives, her household and the officials of the church are expected to be in attendance.

"There have been no physician in attendance, Dr. George L. West of Newton Center, medical examiner for the district, was called early Sunday morning. Dr. West, after investigation, pronounced the death due to 'natural causes' and issued the customary certificate."

"A telegram was sent to her son, George W. Glover, of Leas, S. D., apprising him of his mother's demise, and requesting information as to his attendance and that of his family."

Was In 90th Year.

"Mrs. Eddy was born in Bow, N. H., July 16, 1821, and was therefore in her ninetieth year."

There were very few of the congregation at the morning service of the mother church yesterday who knew that the life of the leader and teacher had ended. The service was as usual and the two readers, Judge Smith and Mrs. Leland T. Bowers, presented the sermon of the day, "God the Only Cause and Creator," with voices that were without emotion and had no suggestion of sadness.

The routine service, which closes with a hymn, the reading of the "Scientific Statement of Being" and the benediction, were strictly followed at the mother church yesterday until just before the benediction, Judge Smith broke through the usual form with the following words:

"I shall now read part of a letter, written by our reverend leader and reprinted on page 135 of 'Miscellaneous Writings.'"

"My beloved students: You may be looking to see me in my accustomed place with you, but this you must not expect. When I retired from the field of labor it was a departure, socially, publicly and finally, from the routine from such material modes as society and our society's demand. Rumors are rumors—nothing more. I am still with you on the field of battle, taking forward marches, broader and higher views, and with the hope that you will follow."

"All our thoughts should be given to the absolute demonstration of Christian Science. You can well afford to give me up, since you have in my last revised edition of Science and Health, your teacher and guide."

"Although these lines," said Judge Clifford, "were written years ago they are true to-day and will continue to be true. But it becomes my duty to attest that Mrs. Eddy passed from our sight last night at a quarter before 11 o'clock, at her home on Chestnut Hill."

Then the greater part of the congregation left their seats in silence. There were no words of sorrow, although many a tear was shed. The great organ pealed its recessional as triumphantly as ever.

Future Leadership.

As the church-goers scattered after the services, the question of future leadership was referred to with great reserve by the leaders and others. Those who expressed a view said there would be no change in the methods of carrying on the work, that Mrs. Eddy's teachings and instruction would be implicitly followed and that the church she founded would continue to grow in the future as it had in the past.

It was pointed out that with the exception of a few routine matters the actual direction of the church work had been relinquished to a great degree by Mrs. Eddy for some years previous to her death, although she continued to keep in close touch with those to whom she had entrusted the work and had a clear understanding of how it was being performed.

The notice which was read at the morning service of the mother church was repeated at the evening service to

## Clergyman's Son Cured of Tuberculosis

To neglect a cold, bronchitis, lung trouble or Consumption is dangerous. We all know how prone people are to deny they have Consumption. It is a flattering disease, and the sufferer is bristling with bright hopes of improvement. Call consumption by its own dread name—and then take Eckman's Alternative, because it is effective in Tuberculosis. No one need doubt about it—there is plenty of evidence from live witnesses.

Amelia, N. Y.

Gentlemen: "Prior to Feb., 1908, I was located in Rochester, N. Y., suffering with La Grippe, which developed into Tuberculosis. My physician gave me one month to live. I was having terrible night sweats and mid-day chills and losing flesh rapidly, having gone from 155 to 135 lbs. I coughed and raised continually and became so weak that walking a few feet exhausted me. On my return home, my regular physician gave me little encouragement. My father, who is a clergyman, heard of Eckman's Alternative and induced me to take it. The night sweats and chills disappeared. My cough became easier and gradually diminished and in a few days I developed an appetite, the first in months. I am now in perfect health and back to 155 lbs. I feel certain that I owe my life to Eckman's Alternative."

(Signed) E. H. COWLES.

Gentlemen: "I cannot find words to express my appreciation of what your remedy has done for my son. It changed despair into hope within two weeks. After he began taking it, and without any doubt in my mind, it saved his life. I wish to add my endorsement to every word of his testimonial."

(Signed) REV. J. J. COWLES, Pastor, Presbyterian Church, Astoria, Ore.

Eckman's Alternative cures Bronchitis, Asthma, Hay Fever, Throat and Lung Affections. Ask for booklet of cured cases and write to the Eckman Laboratory, Philadelphia, Pa., for additional evidence. For sale by all leading druggists and Burt H. Wells in Barre, Vt.

an unusually large congregation and was also read at many of the other Christian Science churches in this section of the country.

Medical Examiner's Statement.

Dr. George L. West, the medical examiner, who was called to the home of Mrs. Eddy and who filled out the death certificate, made the following statement last night:

"I was called to the home of Mrs. Eddy early this morning and arrived there about 9:30. I met at the door by Calvin A. Frye and others of the household who directed me to a bed-chamber on the second floor. Here I met Mrs. Sargent
